

October 9, 2012

I operate a cleaning business in a resort vacation rental community and have used Awesome® Natural Cleaner for 2 years on greasy kitchen stoves, bathtubs, showers, toilets, and laundry. It continually amazes me as to the strength of its cleaning power, ability to remove tough stains, mold and mildew and how it leaves surfaces glossy and fresh-smelling. Awesome® doubles as a disinfectant which saves me time and money.

I've tested it on blood, grease, sticky yellow residue on plastic, chocolate, wine, red hair dye on a white t-shirt, ink on khaki fabric, and remarkably.....oil on concrete! Amazing....or should I say AWESOME!!! It immediately removes dried-on food stuck to any surface and leaves a stainless sink spotless.

I especially like how it works on fabrics. Not only does it remove the toughest stains, I'm amazed at how white my whites are and how the colors resist fading. It far exceeds the level of brightness and stain removal I ever experienced in using other 'oxi-enhanced' products. Additionally, Awesome® Natural Cleaner leaves a fresh citrus scent instead of the chalky odor left by those other products.

Living in a recreational lake area, it's reassuring to know that the product is USDA approved and environmentally friendly. I'm often asked by friends, family and my customers what I recommend for cleaning. Awesome® Natural Cleaner is at the top of the list. Its use in various dilutions is endless. Those that use it can't go without it, especially my daughter-in-law with three active children!
