Dear Mr. Thompson,

I have been using "Awesome" for several months and it's hard to believe, but I have received no complaints from staff or inmates. It is an excellent chemical product for any prison environment. Being non-toxic, inmates are able to use this product unsupervised, compared to cleaning products that carry a WARNING or DANGER label, which require staff supervision and product accountability at all times.

Having multi-uses is another plus. Being able to use the same chemical at different dilution rates reduces the number of different chemicals needed to maintain the institution.

Compared to other multi-purpose cleaners I've tried over the last several years, "Awesome" is the best! It is also the most cost effective. Thank You!

Sincerely,

Malachi J. Mitchell
